1.0 Introduction

OnlineSIS is a Web-based student information system. **OnlineSIS** has been designed to address the most important needs of administrators, teachers, support staff, parents, and students. **OnlineSIS** boasts an intuitive interface to manage student demographic information, perform complex scheduling, and manage student attendance, grades, and eligibility. **OnlineSIS** greatly cuts down the time it takes to report to state agencies and distribute student information to teachers, support staff, and parents.

1.1 Base Product Features

Student Demographics

OnlineSIS enables the tracking of numerous student demographic attributes in a permanent record and across enrollments. Need something not included in the base installation? Use our custom categories and fields that allow you to easily create any number of custom fields to capture your specific data needs.

Contact Information

Easily add contact information for parents, relatives and authorized individuals. Designate legal guardian, bus stops and associate parents with students enabling automatic access to the OnlineSIS parent portal.

Scheduling

OnlineSIS includes a scheduler that allows you to easily input student requests and mass schedule students. You can make multiple schedule runs as you make adjustments and have multiple schedules within a school. View and print student schedules and class rosters with just a few clicks.

Gradebook

The built in grade book allows teachers to enter homework assignments, class tests and any other activity using weighted scales if desired. Automatic tallying of grades, reports to find erroneously entered grades and advanced ad hoc reporting is included. Entering final grades is as easy as a mouse click.

Reports/Report Designer

OnlineSIS includes numerous standard reports and the ability to design custom reports using simple check boxes. Reports are output to PDF format for easy printing and viewing.

Report Cards

Easily input final grades create student report cards and calculate GPA's and class rankings. Change a final grade that will affect GPA or class ranking? Simply recalculate GPA's using the built in function in OnlineSIS. Print one report card, all report cards or anywhere in between with the flexibility of OnlineSIS.

Transcripts

OnlineSIS includes the ability to print student transcripts. Create groups of students across numerous attributes and click a button. It doesn't get any easier and OnlineSIS is all about ease of use.

1.2 BENEFITS

Lower Total Cost of Ownership

□ Unlike commercial solutions in the market, OnlineSIS requires no upfront license fees saving a school incredible amounts of money in implementing a new SIS. Low support and maintenance fees give you complete help desk support at rates more affordable than commercial offerings. Custom services are provided at very low rates helping you to get things done without breaking the bank.

Central Administration

□ Unlike many solutions in the market, OnlineSIS is a centralized relational database eliminating the need for servers in individual schools. This increases security and reduces costs associated with maintenance.

100% Web Based

□ No need for client software. Any industry standard web browser will work. Increases productivity and morale through anytime, anywhere access. Have a system that requires a desktop client to be installed? Have many desktops? All of these have to be maintained by IT. Reduces costs of maintaining the desktop by eliminating maintenance associated with upgrades and patches to rich clients. Experience rich client experience with our extensive use of AJAX technologies.

Hosted

□ We will host the service on our web servers. Returns your focus to what is most important, educating students, and leaves the job of IT to us. Your data is backed up every day. If your server fails, another one takes its place. Always there, always on and always safe, much safer than your place.

Communication

□ Administrators, teachers, staff, parents and even students all use the same interface, the same database and the same data.

Security

□ OnlineSIS incorporates user profiles and configurable permissions down to the individual field level for read and write access. Fields can be hidden as well. Create special roles with custom permissions easily and quickly with a few mouse clicks. You don't have to be a programmer to configure OnlineSIS to meet your unique needs.

Platform Independence

□ Windows today, Linux tomorrow. It doesn't matter as OnlineSIS runs on all major platforms and easily transfers from one to another.

□ User your existing software and existing skills. No need to buy anything new or switch to a new operating system.

Ease of Use, Ease of Administration

□ Can you surf the web? You can use OnlineSIS! Point and click navigation with an intuitive interface and logical workflows make OnlineSIS exceptionally easy to use. Less training, faster staff adoption rates and easy administration ensure that OnlineSIS is working for you.

End User Customization

□ OnlineSIS empowers you enabling you to customize the system to fit your needs.
