Virtual Campus is an **eLearning and eWorking platform** allowing teachers to build effective online courses and to manage learning and collaborative activities on the web.

### **An eLearning and eWorking platform**

Virtual Campus platform allows creating and administering courses and collaboration spaces online. Each course space provides a list of tools enabling the teacher to:

- Write a course description
- Publish documents in any format (text, PDF, HTML, video...)
- Administer public and private forums
- Develop learning paths
- Create groups of students
- Prepare online exercises
- Manage an agenda with tasks and deadlines
- Publish announcements (also by e-mail)
- Propose assignments to be handed in online
- See the statistics of the users activity
- Use the wiki to write collaborative documents

Adjustable to various training contexts, Virtual Campus is not only used by schools and universities, but also by training centres, associations and companies. The platform is customizable and offers a flexible and custom-made working environment.

### **An adequate technology**

Virtual Campus is capable of hosting a large number of users easily. It is compatible with Linux, Mac and Windows environments.

Virtual Campus is based on free technologies like PHP and MySQL and uses the current standards like SCORM and IMS/QTI for the exchange of contents.

### **An easy-handling tool**

Virtual Campus has been developed following teachers' pedagogical experience and needs. It offers intuitive and clear spaces administration interface.

The daily platform management doesn't require any specific technical skill. The platform is quickly installed and the use of any web browser allows to manage the various course sections and enrolled users fluently.
